NPHK Launches New Environmental-Friendly Product

Protecting and preserving the environment is a core belief at Nippon Paint. With this in mind, Nippon Paint Hongkong recently launched the new Nippon Tsuya Ichiban Water Based Top Coat, which delivers superior functions and yet remains environmentally friendly with extremely low VOC as compared with other solvent based paint.

Nippon Tsuya Ichiban Water Based Top Coat can be used on most substrate surfaces such as cement plaster, concrete, masonry, wood and metals, giving them a long-lasting beautiful gloss appearance. Also extremely easy to apply, Nippon Tsuya Ichiban Water Based Top Coat has excellent resistance towards alkali and harsh weather. It can be used for both interior and exterior surfaces.
